

# "Straightening the Crooked Horse"

## 4-Day Clinic by Klaus Schoneich

Dec 4-5<sup>th</sup> and 7-8<sup>th</sup>  
(Dec 6<sup>th</sup> is break day)

Pacific Equestrian Center, Wilton

**Participant slots full – Auditors Welcome**

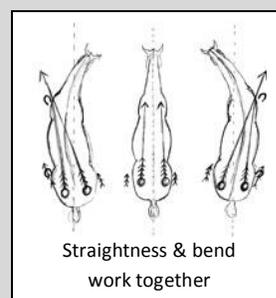

Klaus Schoneich, author of "Straightening the Crooked Horse," focuses on helping horses straighten themselves naturally. Teaching lunging and in-saddle training techniques, Klaus offers a revolutionary holistic system for straightening horses' bodies that helps the horse find his center of balance, through re-balancing the hind-end and freeing shoulder movement.

Participants have committed to all 4 days. Watching the horses progress through the clinic will greatly enhance your learning.

Auditing: \$45 for one day or \$65 for unlimited days.

For details on Klaus' approach visit his web site at: [www.arr.de](http://www.arr.de) (click on English link).

Clinic questions - contact Megan Soske (916) 548-6948

## The Clinic

Klaus initially trains the horse on the lunge - with only a cavassan. He then teaches the owner how to continue the work on the lunge and under saddle. Klaus interacts with the audiences to teach them what he's looking for and how to see changes in the horse's movement.

Pre-clinic (Dec 3<sup>rd</sup>) Review of concepts, led by clinic organizer. Klaus will **not** be present.

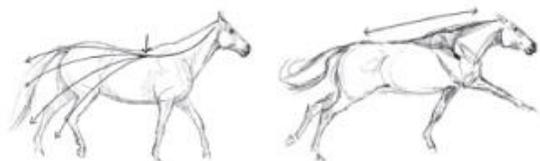

Day 1 Morning: Evaluation of Horses (20 min lunge sessions)  
Afternoon: Review of videos of morning lunge sessions  
20 min lunge session for each horse

Day 2 Two 20 min lunge sessions for each horse - Klaus works with the horses

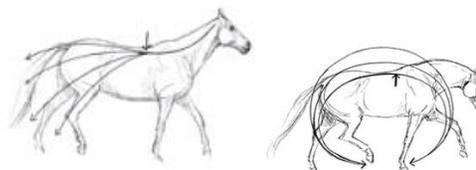

Day 3-4 Two 20 min lunge sessions for each horse  
(Klaus or owner works with the horses. Horse goes under saddle when ready.)

## Poor performance and bad behavior can result from ingrained, often natural crookedness.

It accounts for 95% of movement problems in both pleasure and sport horses. Imbalance in a moving horse – stemming from basic anatomy and physiology or incorrect training – affects the health, strength, and temperament of the horse. Klaus' training program helps riders and their horses achieve true straightness to improve the horse's health and performance in any discipline.
